

1980

**Annual
Report**

**Commissioner of
Internal Revenue**

IRS

Addenda:

Statistical data used in the text and tables of this volume are on a fiscal year basis, unless otherwise noted. For example, data headed "1980" pertains to the fiscal year ended Sept. 30, 1980.

Graphs, charts and text figures have been rounded and may not compute precisely compared to the statistical tables, which are based on unrounded figures.

The Commissioner's Annual Report is produced by the Office of Public Affairs, Room 1112, Internal Revenue Service, 1111 Constitution Ave., N.W., Washington, D.C. 20224.

It is available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Appendix/49

This is my fourth annual report as Commissioner of Internal Revenue, and my last. I would therefore like to discuss some of the goals, accomplishments, unfinished business and frustrations of tax administration from a somewhat broader perspective than is customary in an annual report.

In my letter of resignation to the President I said, "The fair and sensitive administration of tax laws is crucial to the existence of a just society. I feel privileged for the opportunity you have given me to participate in this important work."

If we expect taxpayers to comply voluntarily with our tax laws we have an obligation to assure them that the law is administered evenhandedly, that compliance activities are fairly directed, that help is available to cope with the complexities of our system, that there is a fair and speedy method to resolve conflicts and that complaints are resolved expeditiously. I believe we have made substantial progress in meeting these obligations in the past 3 1/2 years.

Improving fairness in directing compliance activities has resulted in substantially increased attention to abusive tax shelters. Through abusive tax shelters many high-income taxpayers claim substantial unwarranted reductions in their income tax liabilities. This situation, if uncorrected, is unfair to average taxpayers and demoralizing to the tax system. Dealing effectively with abusive shelters has proved to be a difficult undertaking requiring substantial examination, technical and legal resources. But it is an essential undertaking. We have identified approximately 27,000 abusive shelters involving about 190,000 tax returns claiming deductions of over \$5 billion.

It is worth noting that tax shelter activities are not a problem inherent in an income tax. These activities come about largely as a by-product of provisions put in the tax law to achieve nontax goals; to encourage or reward conduct considered to be socially or economically desirable. Virtually all of the tax shelters we have seen are based on the use or abuse of provisions in the Code that, because they are essentially expenditure programs engrafted onto the tax law, deviate from the proper measurement of income; for example, accelerated depreciation, immediate deduction of intangible drilling costs, immediate deduction of development expenses of mineral deposits, investment credit, deductibility of charitable contributions of property at market value rather than cost and immediate deduction of research and development costs. Unless Congress is prepared to reverse the trend of using the tax code for purposes other than the computation of income as a measurement of

ability to pay taxes, ways must be found to prevent abuses of these tax expenditure provisions.

The willingness of taxpayers to "invest" in tax shelter schemes providing claimed tax benefits unlikely to be sustained is, in my view, largely the result of an inadequate penalty structure in our tax laws. The taxpayer is induced to play the "audit lottery" because there is little or no risk or cost in playing and losing. If the taxpayer claims questionable deductions and he is not audited, he has won. (We have reduced but not eliminated the odds against winning by increased audit coverage of these returns.) If he is selected for audit and the claimed deductions are disallowed he may still have won because he has deferred his tax payment at a favorable rate of interest. This deferral period is often quite long, particularly if the taxpayer contests the proposed disallowance in court, even if he concedes before trial.

While the *Internal Revenue Code* provides a penalty for negligence, it is often not sustainable against a taxpayer who claims to have relied on the advice of promoters, their lawyers and accountants, particularly if the transaction involves very complex provisions of the law, and frequently even if the professional opinion concludes that the claimed tax benefit is probably not available.

I believe a reexamination of the penalty provisions is in order. If there were a risk commensurate with the claimed rewards then taxpayers and their advisers would make a more realistic assessment of the allowability of the claimed tax benefit before making the "investment." Such penalties could be limited to substantial deficiencies.

The role of the professional adviser in the marketing of tax shelters has been a concern to the Service for some time. Since the applicability of existing penalties may depend on the participation of tax professionals in the scheme, they have a particular responsibility to the Treasury in undertaking such participation. In many tax shelter schemes it appears that the product actually being marketed is the lawyers' or accountants' opinion. It is that opinion that is viewed as giving the "free ticket to the audit lottery." Therefore the Treasury Department recently proposed revisions to Circular 230 governing standards of practice before the Treasury Department that deal with this problem.

An area of tax shelter activity that deserves special comment because of its growth in recent years is the use of commodity or financial futures contracts to create artificial losses and deductions. These transactions come in a dazzling

array of forms and combinations. What they all have in common is the claim of deductions and losses far in excess of the taxpayer's actual losses or his risk of loss. Essentially the taxpayer has various market positions designed to balance gains against losses so that a loss in one position will be roughly offset by a gain in another. The taxpayer then claims a loss on one side of the transaction, simultaneously establishes a position to secure his offsetting gain and defers realizing the gain to a subsequent tax period. In some combinations it is claimed that the loss is short term or ordinary and the offsetting gain is a long-term capital gain. The Service has established special programs designed to identify returns with such transactions and to combat these abuses. But legislative action is needed to prevent taxpayers from claiming these deductions and losses in the first place. The issue is very serious, involving claimed losses of hundreds of millions of dollars. It is an affront to our tax system to permit taxpayers who frequently have among the highest incomes in the country to file returns showing little or no tax due as a result of transactions with little economic significance.

Largely because of the use of tax shelters the Service has changed the way it classifies returns for audit coverage and other purposes. For many years returns were grouped by classes based on adjusted gross income (AGI) and generally the higher-income classes received greater audit coverage. However, artificial deductions — largely tax shelters — have caused many returns of taxpayers with high real incomes and complicated financial and tax affairs to be classified in low AGI classes with a correspondingly smaller audit coverage. To correct this problem and more effectively allocate audit resources we have changed our system of classifying returns for all purposes to one based on total positive income (TPI). TPI is a more accurate measure of the taxpayer's tax affairs. The result of this reclassification will be that more examination resources will be devoted to higher-income taxpayers. This reclassification will reduce the total number of tax returns examined as resources are diverted from simpler to more complex returns, but will improve the fairness of the examination program.

Traditional audit activity involving an examination of taxpayers' records is not the only program the Service has for verifying compliance with the tax laws. The information returns program (IRP), which matches information documents furnished by payers of wages, interest, dividends and certain other income items with

income tax returns, has been significantly expanded in recent years. The Service has increased the number of documents matched and provided new improved systems for the use of the information resulting from the match.

During fiscal year 1977, IRS processed 50.5 percent of the 481 million documents received. The Service plans to process 84.5 percent of the 547 million documents received during this fiscal year. This very substantial increase is largely the result of the Combined Annual Wage Reporting program. Under this program employers send their W-2s to the Social Security Administration, which converts the information to computer tapes that IRS can then process directly.

New procedures for handling information documents, in place for the first time this year, will provide tax examiners with the information from IRP documents at the time individual tax returns are examined. This information should substantially increase the efficiency and effectiveness of the examination program. We have also, for the first time, revised our processing system to provide early notices of nonfiling of tax returns in association with the IRP program.

While the information returns program is effective for identifying substantial numbers of apparent underreporters and nonfilers, it is impossible because of resource constraints to pursue every lead. Therefore, selections must be made of those leads most likely to be productive, just as we select for audit those returns that appear to be most in need of audit. We have undertaken several research efforts designed to improve our selection systems, which we hope will further improve the productivity of this very important program.

In last year's annual report I commented on the study the Service had published on "Estimates of Income Unreported on Individual Income Tax Returns." That report estimated that between \$75 and \$100 billion of income from legal sources was not reported for tax year 1976. During that year \$1.1 trillion of income was reported. This unreported income is a concern to the Service and should be a concern to all taxpayers. The failure of some taxpayers to pay their required share of taxes increases the burden on honest taxpayers. High compliance is essential to a fair tax system — to avoid overtaxing the honest.

While examination and document matching are effective programs they cannot equal the level of compliance achieved when income is subject to withholding unless extended beyond levels that are economically feasible and socially acceptable. The goal of tax administration should be to

have high compliance with little intrusiveness. Broadened withholding of tax at the source would make a substantial contribution toward reaching that goal.

It is therefore disappointing that Congress rejected the Administration's proposal to withhold taxes from certain dividend and interest payments, and has not yet acted on a proposal to withhold taxes on payments made by businesses to certain independent contractors — those most like employees.

Evenhanded administration of the tax laws obviously requires not only the fair allocation of compliance resources but the uniform application of the tax laws. Our regulations, revenue rulings, letter rulings and technical advice are the means by which we inform the taxpaying public and our own personnel of the Service's position on the many interpretive problems that arise in applying the tax laws in our complex society. They are the means by which we seek to insure the uniform application of the laws so that taxpayers with similar transactions are treated similarly.

In recent years Congress has prohibited the Service from issuing such interpretations concerning the taxation of fringe benefits, determinations concerning racial discrimination in tax-exempt schools, the taxation of commuting expenses and section 280A relating to relatives' use of rental property, office in the home and repairs of rental property as personal use. In each of these instances, while the Service is prohibited from issuing regulations and rulings the underlying law was not changed and, therefore, the interpretive problems have not disappeared. Our personnel use their best judgment in interpreting the law but inevitably in some cases these judgments will vary. The result is that different taxpayers are treated differently and the Service is prohibited from resolving these inconsistencies.

A particularly dramatic illustration of this problem is the situation involving private schools. As a result of a class action involving Mississippi schools the Service was ordered by a federal district court to apply rules to determine whether certain private schools discriminate racially and are therefore ineligible for tax exemption. The court-ordered rules are very similar to rules the Service is specifically prohibited by Congress from applying in the rest of the country. Such congressional actions do nothing to enhance respect for the tax system or for government. Almost any clear substantive rule that can be applied uniformly is better than the present situation.

Our tax laws are complex — more complex than they need to be although real simplicity is impossible. Simple rules cannot be devised to compute fairly the tax liabilities of multinational corporations, syndicated partnerships or generation-skipping trusts. Complex transactions frequently require complex rules.

But many of the complex provisions of our tax laws are unnecessary to the administration of an income tax, that is, not necessary to the appropriate measurement of a taxpayer's ability to pay tax. Rather they are essentially expenditure programs administered through the tax laws. There are close to 100 of these provisions listed in the current budget and together, I think it is fair to say, they are responsible for most of the complexity facing the average taxpayer.

Apart from the merits of the goals sought to be achieved by these provisions and apart from the structure of the particular program, i.e., how its benefits are distributed and the criteria for qualifying, there is a substantial price that is paid in using the tax system for purposes other than measuring income. That price is complexity. While no single tax expenditure can be said to overburden the tax system, in total they do. Too little attention is paid to the damage to the tax system — to the average taxpayer's feeling about the fairness of the tax system — in enacting these provisions. Taxpayers cannot be expected to believe that a tax system is fair if they cannot understand it and our tax laws are understandable to too many people required to comply.

Moreover, there is a tendency to overrefinement of many provisions of the law in the name of fairness. I would like to repeat what I said in remarks earlier this year to the Inter-American Center for Tax Administrators.

"In a desire to differentiate carefully among taxpayers with slightly different abilities to pay, we may inadvertently, and with the best of intentions, reduce the perceived fairness of the system, and even its actual fairness, if the nuances of the system become too complex and subtle to be managed by the average taxpayer. This situation seems particularly apparent in the case of certain deductions. It seems entirely reasonable to put great weight on simplicity rather than perfect fairness where the differences to be achieved are usually small, are not limited to a particular economic class of taxpayers, and are not subject to significant abuse."

While we wish for simplicity we must administer complexity.

Commissioner Jerome Kurtz (seated center) and his executive staff. Standing (left to right) are: Charles H. Brennan, North Atlantic Regional Commissioner; Robert L. Rebut, Assistant Commissioner (Inspection); Donald J. Porter, Assistant Commissioner (Data Services); M. Eddie Heironimus, Assistant Commissioner (Taxpayer Service and Returns Processing); Eugene D. Alexander, Assistant to the Commissioner (Equal Opportunity); Philip E. Coates, Assistant Commissioner (Compliance); Harold M. Biewing, Taxpayer Ombudsman; Russell E. Dyk, Assistant Commissioner (Planning and Research); Harold A. McGuffin, Southeast Regional Commissioner; Roger L. Platte, incoming Midwest Regional Commissioner; Leon C. Green, Central Regional Commissioner; Charles F. Miriani, retiring Midwest Regional Commissioner; and S. Allen Wimbome, Assistant Commissioner (Employee Plans/Exempt Organizations). Seated (left to right) are: Domnick J. Lantione, Assistant to the Deputy Commissioner; Joseph T. Davis, Assistant Commissioner (Resources Management); James I. Owens, Southwest Regional Commissioner; William E. Williams, Deputy Commissioner; Commissioner Kurtz; Gerald G. Portney, Assistant Commissioner (Technical); Thomas A. Caspola, Western Regional Commissioner; A. James Galano, Assistant to the Commissioner (Public Affairs); and William D. Waters, Mid-Atlantic Regional Commissioner. Assistants to the Commissioner: Melvin Katz, David P. O'Connor and Stanley Koppelman were not present for the photo.

Resources for taxpayer service activities must compete with those for compliance functions and for the processing of returns. Compliance functions produce a direct yield to the Treasury many times their cost. There is, therefore, some pressure, particularly in the face of the tight budgets we have experienced over the past four years, to direct resources to those functions. I firmly believe, although cannot prove, that voluntary compliance is better when taxpayers are treated fairly. We cannot measure the contribution towards voluntary compliance of enforcement or service functions. In enforcement we can measure direct yields but not improved voluntary compliance, which I believe is much more important than direct yield. And service to taxpayers has no direct measurable yield.

But fairness requires that the government help taxpayers comply with the burdens it has imposed and we have emphasized and improved our service operations over these past years.

We were able to make major revisions of the forms in 1977 largely as a result of the Tax Reduction and Simplification Act of 1977. As a result of those changes and efforts to expand use of the simple Form 1040A by those taxpayers who can use it, the number of 1040A filers increased by 8.7 million taxpayers from 1977 to 1980 while the number of long form filers decreased from 56.5 to 55.3 million.

The 37.6 million taxpayers who now use the Form 1040A face little of the complexities of the *Internal Revenue Code*. Real simplification of the system is achieved each time a taxpayer uses the 1040A rather than the 1040. To provide further assistance to taxpayers, our instruc-

tions have been thoroughly revised and simplified.

The number of telephone calls answered, the accuracy of the answers and the number of taxpayers serviced at our offices have all increased. This past fiscal year we answered 35 million telephone calls and served 8 million taxpayers at our offices.

We have a substantial effort underway to improve the understandability of the various notices we send to taxpayers, many of which are indeed bewildering. I hope we can make them less so.

There is probably nothing more frustrating to taxpayers than the difficulty sometimes encountered in trying to get the Service to correct a mistake that it has made. Mistakes are not limited to the IRS. They are inevitable and the difficulty of correcting them seems to be a function of the size of the organization making them.

To help taxpayers who have been unable to get errors corrected in the normal course of dealing with the Service, an experimental problem resolution program was undertaken in 1976. We have now expanded this operation to every district office and service center. Each such office now has a special staff charged with the responsibility of straightening out persistent problems. The problem resolution officers have the knowledge to cut through red tape and solve such problems on a personal basis. There is follow-through on each problem handled to make sure it is properly resolved. Last year over 200,000 problems were handled in this program with a very high degree of satisfaction among taxpayers

This year, to give added emphasis to this program, to increase its importance and expand its responsibility, I created a Taxpayer Ombudsman in the National Office who supervises all problem resolution functions and who represents taxpayers' interests generally. The Ombudsman reports directly to the Deputy Commissioner and the Commissioner.

Fairness to taxpayers also requires that they have a ready means to resolve technical or legal disputes with the Service. During 1978 we reorganized our administrative appeals system. Prior to the change taxpayers could take their disputes to a district conference and then to the Appellate Division. District conferees had only limited settlement authority and were under the jurisdiction of the district office that had made the determination being contested. The Appellate Division was independent of the district office and had full settlement authority but appellate conferences were not held in as many locations as district conferences and were therefore less convenient for many taxpayers.

Under the reorganization district conferences were eliminated and the Appellate Division was expanded. Now taxpayers have a single hearing with an appeals officer who has full settlement authority, is independent of the district office and is available at every location where district conferences were formerly held. This reorganization has resulted in more prompt and convenient resolution of disputes.

Finally, I believe that a basic principle underlying a fair tax administration system is that individuals are entitled to a high degree of privacy protection in their tax returns and in the records they must maintain to meet their tax obligations. We should not put these taxpayers in the dilemma of complying with the tax laws at the risk of prosecution for nontax criminal violations. The Internal Revenue Service's primary task is to collect taxes under a voluntary compliance system, not to enforce the Nation's nontax criminal laws, collect nontax debts or gather statistics for nontax purposes. Tax returns and tax administration should be used for tax purposes. We will pay a heavy cost if we use the resources of the tax system in an attempt to achieve nontax objectives.

I leave the next Commissioner a professional and nonpolitical organization of public servants dedicated to doing a difficult job fairly. I am honored to have served.

Jerome Kurtz

Jerome Kurtz
Commissioner of Internal Revenue

Returns Received

The Internal Revenue Service received 143.4 million tax returns and supplemental documents during 1980, for a 2.3 percent increase over the 140.2 million received in 1979. Over 93.1 million, or 64.9 percent of all returns received, were individual tax return Forms 1040 and 1040A, while 90.8 million had been received in the previous 12-month period. More than 37.6 million individual taxpayers — 40.4 percent of all individual filers — used the Form 1040A, compared to over 36.1 million in 1979, a rise of 4.3 percent. The number of individual taxpayers filing Form 1040 increased 1.4 percent from 54.5 million to 55.3 million this year.

Number of Returns Filed, by Principal Type of Return (Figures in thousands. For details see Statistical Table 7.)

Type of Return	1979	1980
Grand Total	*140,201	143,446
Income Tax, total	*104,910	107,827
Individual	*90,803	93,143
Declaration of estimated tax	8,425	8,699
Fiduciary	1,804	1,877
Partnership	1,353	1,390
Corporation	*2,525	2,718
Estate Tax	159	148
Gift Tax	202	216
Employment Tax	26,219	26,499
Exempt Organization	450	444
Employee Plans	1,214	792
Alcohol, Tobacco and Firearms	*543	547
Excise Tax	*1,014	909
Supplemental Documents*	*5,490	6,064

*Data revised from previous annual report.
* Includes Forms 1040X, 1120X, 2688, 4868, 7004, Tent. 1120L & M, 7005, 990AR, 4578, 6069, 990BL, 1041A and 2438.

Mathematical Correction

As a result of checking the mathematics on 88.9 million individual returns, 2.9 million taxpayers were found to have made mistakes that overstated their tax liabilities by \$591 million, an average of \$203 per return. On 3.6 million returns taxpayers had understated their tax liability by \$1.1 billion with an average of \$315.

Error rates for Forms 1040 and 1040A rose slightly in 1980, with 6.3 percent of the 1040As processed having mathematical errors compared to 5.5 percent for 1979. The error rate for Forms 1040 was 7.5 percent in 1980, 7.3 percent in 1979. The error rate increase is mostly due to math error notices being sent to taxpayers who qualified for the earned income credit but did not claim it on their returns.

The IRS also checked the amounts claimed for estimated tax payments and found that taxpayers underclaimed \$618 million and overclaimed \$752 million.

Individual Income Tax Returns Mathematically Verified (In thousands)

	1979	1980
Number verified by computer	87,382	88,945
Number of returns on which mathematical errors were detected	6,003	6,468

Estate and gift taxes	6,498,381	108,901	6,389,480	1.4
Excise taxes	24,619,021	289,865	24,329,156	5.2

¹ Does not include interest paid on refunds. In the narrative, the total refund figure of \$54.0 billion includes \$504 million interest.

* Refunds of Forms 1040 and 1040A minus FICA, but including employment tax.

Tax Receipts

Gross tax receipts in 1980 rose to \$519.4 billion, passing the one-half trillion dollar mark for the first time. Total receipts showed an increase of \$59 billion — 12.8 percent — over 1979.

Income taxes accounted for over two-thirds of all tax receipts. Individual income taxes of \$287.5 billion reflected an increase of \$36 billion, or 14.3 percent over the prior year. Corporation income tax receipts were \$72.4 billion, for an increase of \$932 million or 1.3 percent.

Social security, self-employment, federal unemployment and railroad retirement taxes totaled \$128.3 billion, up \$15.5 billion, or 13.7 percent, from 1979. This rise reflects an increase in the social security tax rate from 12.1 to 12.26 percent on Jan. 1, 1979, and an increase in the earnings base from \$17,700 in 1978 to \$22,900 in 1979 and to \$25,900 in 1980.

Excise tax revenue rose to \$24.6 billion, up \$5.6 billion, or 29.2 percent, over last year. The sharp increase was due primarily to receipts from the new windfall profit tax.

Estate and gift taxes increased by \$1 billion — 17.7 percent — to \$6.5 billion.

Refunds

The IRS paid \$54 billion in total refunds to 75 million taxpayers including 4.5 million checks totaling \$1.3 billion for taxpayers who claimed the earned income credit. In 1979, 69 million refunds totaling \$41.7 billion were paid. This year refunds to 72.3 million filers of Forms 1040 and 1040A were \$44.4 billion, including interest, averaging \$614 compared to an average \$518 paid to 67.3 million individual taxpayers in 1979. Refunds of \$8.1 billion were made to 560,000 corporate taxpayers, while refunds of employment, excise, estate and gift, railroad retirement and FUTA taxes totaled \$1.5 billion.

¹ Collections are adjusted to exclude amounts transferred to the Government of Guam.

² Estimated collections of individual income tax withheld are not reported separately from old-age, survivors, disability and hospital insurance (OASDHI) taxes on wages and salaries. Similarly, collections of individual income tax not withheld are combined with OASDHI taxes on self-employment income. The amount of OASDHI tax collections shown is based on estimates made by the Secretary of the Treasury pursuant to the provisions of

sec. 201(a) of the Social Security Act as amended, and includes all OASDHI taxes. The estimates shown for the two categories of individual income taxes were derived by subtracting the OASDHI tax estimates from the combined totals reported.

³ Includes Presidential Election Campaign Fund amounting to \$35,933,816.

⁴ Includes Presidential Election Campaign Fund amounting to \$38,831,653.

The Tax Dollar-- Where It Came From

Gross Collections (Net Collections)

Penalties

Under law the IRS levies penalties such as those for failure to pay, paying with bad checks, filing late or committing negligence and fraud. In 1980 the IRS assessed 20 million penalties for a total of \$2.1 billion. For details see Statistical Table 14.

Tax Credits

This year \$775 million in child-care credits, available to working parents meeting certain requirements, were claimed on 3.7 million returns. Earned income credit (EIC) of \$2 billion was claimed by 7.1 million low-income taxpayers who maintain a home for themselves and at least one dependent. The Revenue Act of 1978 provided for advance payment of EIC in employee paychecks to give employees the option of receiving the credit amount each payday rather than waiting until the end of the tax year to get refunds from filing of individual income tax returns. Since the program began on July 1, 1979,

\$26.1 million of advance EIC has been paid out by employers and reported on 39,300 employment tax returns.

Employers claimed \$582 million on 286,000 returns for the targeted-jobs credit in 1980. This credit replaced the new-jobs credit and is designed to encourage employment of specific groups.

This year taxpayers claimed \$478 million in credits on 4.8 million returns for energy conservation and renewable energy source expenditures made on their residences. This credit was provided by the Energy Tax Act of 1978.

Another tax credit of the Energy Tax Act of 1978 is the business energy investment tax credit (BEITC). The BEITC is refundable and can result in a refund in excess of tax liability based upon investments in solar and wind energy property placed in service between Sept. 30, 1978, and Dec. 31, 1979. This year taxpayers were allowed \$3.5 million to satisfy their current-year tax liability and \$2.3 million in excess of their current-year tax liability.

Presidential Election Campaign Fund

This year 25.3 million individual income tax returns had designations for the Presidential Election Campaign Fund — 27.4 percent of the returns processed. Designations amounted to \$38.8 million compared to \$35.9 million designated in 1979 on 23.2 million individual tax returns, or 25.8 percent of those processed. The cumulative amount credited to the fund since 1972 is \$246.2 million.

Combined Annual Wage Reporting

Combined annual wage reporting (CAWR) is a system developed to reduce the reporting burden for employers while still satisfying the reporting requirements of both the IRS and the Social Security Administration (SSA). This reporting system became effective with all wages paid after Dec. 31, 1977, for domestic employers and after Dec. 31, 1978, for employers in U.S. Possessions and Puerto Rico. Under CAWR, Schedule A, which required a detailed listing of employee information, is no longer filed with employment tax Forms 941, 942 or 943, and the

Processing Pipeline

Returns are delivered to the Regional Service Centers.

Envelopes are opened and counted.

Returns are sorted by type of return.

Tax returns and accompanying checks are compared.

Returns are edited and coded for computer processing.

Tax return information is placed on magnetic tape for computer processing.

IRS computers check returns for mathematical accuracy.

Tapes are sent to the National Computer Center for Account Posting and Settlement.

Tapes of Refunds are sent to the Treasury Department Disbursing Center for issuance of checks directly to taxpayers.

Once a tax return reaches one of ten IRS Service Centers, it travels through a series of processing steps known as "the pipeline."

While many parts of the pipeline shown here are automated for faster processing and faster refunds, people are involved every step of the way.

Form W-2 was redesigned to include the Federal Insurance Contributions Act (FICA) information formerly filed on Schedule A. The Forms W-2 are filed with the SSA, which processes the information and supplies it to the IRS.

During 1980 the IRS began a reconciliation between the employment tax returns such as Forms 941 and 942 and the wage returns such as Forms W-2 filed by employers for calendar year 1978 to insure that the correct tax has been paid over to the government and that employees receive the correct FICA coverage with SSA.

Windfall Profit Tax

The Crude Oil Windfall Profit Tax Act of 1980 imposed an excise tax on crude oil and certain natural gas liquids produced from domestic oil and gas wells after March 1, 1980.

Although the windfall profit tax is imposed upon the producer the law provides that the first purchaser of domestic crude oil generally is liable for deducting and withholding tax from the purchase price, depositing the tax and filing quarterly tax returns. This tax affects almost every taxpayer who owns any kind of an interest in an oil or gas well, including royalty owners, working interest owners and operators, as well as multinational oil companies.

Temporary regulations, dealing primarily with the administrative provisions of the law, were available the day of its enactment. Revenue rulings will be published, as necessary, to provide clarification and one revenue ruling already has been issued involving the severance tax adjustment.

The amount reported for the windfall profit tax in 1980 was \$3.1 billion and the first windfall tax examinations were begun in the fall of 1980.

A multifunctional IRS task force has been formed to identify problems and recommend solutions for the implementation of what is projected to be a 10-year program to collect \$227 billion enforcing this tax.

Write, Call or Walk In

This year the IRS received about 102,000 written, 35 million telephone and 8 million walk-in inquiries from taxpayers requesting information about the tax system, their rights and obligations under it and the tax benefits available. In 1979 the IRS responded to 96,000 written, 33 million telephone and 8 million walk-in inquiries.

More than 59 percent of this year's 43.1 million inquiries, 25.6 million requests for assistance, occurred between January 1 and April 25 — over 20 million phone calls, more than 5 million walk-in inquiries and over 36,000 items of correspondence. A quality check of 243,000 telephone responses and returns prepared by IRS assistants during this same period found an overall accuracy rate of over 97 percent.

Toll-Free Telephone Assistance

Over 97 percent — 19.8 million — of the telephone calls received during the 1980 tax return filing period were made through the toll-free

telephone system that allows taxpayers from throughout the United States to call IRS for information without paying long-distance charges. In 1979, 18.7 million of the telephone calls were made through the toll-free system.

Over 80 percent of these telephone calls are answered by front-line assistants. Referrals requiring computer research or more advanced technical assistance are resolved by IRS employees who have received specialized training in these areas. This year the IRS answered over 3.7 million account referrals, including inquiries on refunds, notices received and tax payments. In addition, employees answered about 2.8 million technical referrals, responding to questions on corporation tax law, estate taxes, employment taxes and a wide variety of other complex inquiries.

Teletypewriter equipment with a nationwide toll-free number giving hearing-impaired taxpayers access to telephone assistance was extended to Alaska, Hawaii, Puerto Rico and the Virgin Islands in 1980.

Walk-In Service

Walk-in taxpayer assistance was offered at inner-city, business district, suburban and rural locations with 702 permanent offices and 142 temporary offices set up especially for the filing period. In addition, over 37,000 banks and Postal Service locations helped distribute more than 290 million tax forms and instructions.

The IRS provided foreign language assistance at 204 of its 844 taxpayer service offices. Spanish language assistance was offered at 154 of these offices by 600 employees, while 108 offices and 431 employees assisted in other languages.

Disaster Assistance

In 1980 the IRS provided help in preparing amended returns and casualty loss claims and in getting refunds faster to taxpayers in 23 states and 138 counties affected by floods, hurricanes, tornadoes and the eruption of Mount St. Helens.

Educating Taxpayers

The *Understanding Taxes and Fundamentals of Tax Preparation* programs reached more than 5 million high school and college students last year. IRS-sponsored workshops for nearly 43,000 small business owners helped make taxpayers aware of their tax rights and responsibilities. In addition, 538 institutes were held for tax practitioners.

Through the volunteer income tax assistance program (VITA) the IRS recruits, trains and supports volunteers who prepare tax returns for low-income, nonEnglish-speaking and military taxpayers. This year more than 355,000 federal income tax returns were prepared by almost 55,000 volunteers. In 1980, as a result of a new program of tax counseling for the elderly, the IRS entered into agreements with nonprofit organizations to provide free tax help to individuals age 60 and over, with volunteers reimbursed for out-of-pocket expenses.

Forms and Publications

The IRS contracted with an outside firm last year to revise and test the individual tax forms. Prototype forms have been developed and limited tests were conducted at various sites around the country. After the results of these tests are analyzed, large-scale testing with revised forms will begin early in 1981.

Public hearings held in Atlanta, Omaha, Seattle and Burlington resulted in many suggestions on how to simplify the federal tax return forms and instructions and after studying the suggestions the IRS has adopted a number of them. In addition, volunteers in San Francisco, Des Moines and Jacksonville tested the Form 1040 individual income tax returns and related schedules. The tests will assist IRS in locating and modifying areas of particular difficulty on the forms. Computerized readability analyses also are being used to identify parts of the tax forms instructions that can be made easier to read.

The IRS distributed many taxpayer information publications free of charge including 2.8 million copies of *Your Federal Income Tax*, 1.4 million copies of the *Tax Guide for Small Business*, 805,000 copies of the *Farmer's Tax Guide* and 71,500 copies of the *Tax Guide for Commercial Fishermen*. Additional tax materials were furnished to 7.1 million taxpayers, 580,000 tax practitioners and 436,500 employers. The IRS publishes more than 90 booklets — three in Spanish — on specific tax topics.

Informing Taxpayers

Major television and radio networks and local broadcasters provided free airtime having an estimated worth of \$5.5 million for this year's public service spot announcements giving taxpayers information on provisions of the tax law and guidance on filing tax returns properly.

A new film, "A Right Good Thing" was produced to familiarize older Americans with tax counseling for the elderly and other available assistance in preparing income tax returns.

Specialized media receiving IRS information this year included newspapers and magazines read by farmers and fishermen, working parents, older Americans, barbers, beauticians and service employees of hotels and restaurants. The information covered special tax responsibilities and benefits of particular interest to these taxpayer groups.

The IRS issued more than 7,000 news releases and responded to nearly 20,000 media inquiries through the National Office and 75 field locations.

Clarifying Notices

In response to concern about the clarity of IRS computer-generated correspondence, a special effort began in July 1980 to review, revise and reformat all such notices. The goal of this project is to make it easier for taxpayers to understand why they have received notices and what action, if any, they need to take in response. The IRS plans to begin using revised notices in January 1981. Taxpayer reaction to the notices will be tested and feedback received will be used in considering future notice revisions.

Making information Available

During calendar year 1979 the IRS processed 9,249 requests for IRS documents made under the Freedom of Information Act — an increase of 22 percent over 1978. Of this total, 5,716 were granted in full, 1,097 were granted in part and 2,436 were either incomplete requests or requests denied in full. The National Office reading room serviced approximately 31,000 additional requests for documents available to the public, including returns of exempt organizations, pension plans and private letter rulings — a 17 percent increase over the prior year.

Under the Privacy Act of 1974, individuals made 371 requests for access to records about themselves and 20 requests to amend or correct these records. The IRS permitted full access in 185 of these requests and granted partial access in 82. The remaining 124 were either incomplete or denied in full.

Approximately 8,000 disclosures of tax information were made to the Department of Justice; 188,000 to federal, state and local child support enforcement agencies and 71 million to state tax agencies under specific disclosure provisions in the *Internal Revenue Code*.

Effective June 1, 1980, authority for disclosure of tax returns and return information to federal agencies for use in nontax criminal investigations was delegated to field offices to improve the timeliness of disclosure services.

The IRS has agreements with 94 state tax agencies for reciprocal exchange of confidential information. This federal-state exchange program increases tax revenues, reduces duplicate examinations and increases taxpayer compliance for both state tax agencies and the IRS. This year the IRS approved implementation agreements with 63 state tax agencies to identify more precisely the information to be exchanged and limit disclosures to information that is needed and used.

The IRS and the California Franchise Tax Board this year developed procedures that will eliminate duplicate paper processing of information returns filed. Each agency will transcribe a separate group of documents and exchange magnetic tape extracts. This cooperative effort will result in almost 100 percent transcription of information returns filed by California residents for use in document matching. The IRS is continually exploring methods of exchanging information by magnetic tape to improve utilization of state and federal tax administration resources.

Helping Other Countries

In 1963 the IRS, in cooperation with the Agency for International Development (AID), initiated a program to assist foreign governments in modernizing their tax administration systems. During the past 17 years IRS advisers have been assigned to thirty-eight countries, the Caribbean Community and the Central American Secretariat for Economic Integration for periods from two weeks to several years.

In 1980 the IRS provided long-term assistance to Egypt, Liberia and Sierra Leone, while projects were completed in El Salvador, the Northern Mariana Islands and the Trust Territories of the Pacific Islands. Short-term projects were conducted in Jordan and Trinidad and Tobago.

This year 405 officials from 74 countries visited the IRS for orientation and observation programs. Since 1963 over 5,750 visitors from 134 countries have participated in these programs. The IRS also presented a seven-week INTAX seminar in tax administration for tax officials from six countries and provided a guest speaker at a seminar on computer-assisted audits sponsored by the Brazilian Ministry of Finance school.

Problem Resolution

The problem resolution program (PRP) was established nationwide in 1977 to bring special attention to persistent taxpayer problems and complaints not promptly or properly resolved

through normal procedures. In October 1979 the program was expanded to include all ten IRS service centers.

Late in 1979 the IRS established a Taxpayer Ombudsman in the Office of the Commissioner to administer the nationwide problem resolution program, represent taxpayer interests and concerns within the IRS decision-making process, review IRS policies and procedures for possible adverse effects on taxpayers, propose ideas on tax administration that will benefit taxpayers and represent taxpayer views in the design of tax forms and instructions.

The Taxpayer Ombudsman is not intended as a substitute for existing appeals procedures, nor is it meant to be another level of appeals for deciding substantive tax disputes, although advice on appeal rights is provided to taxpayers and complaints about appeals procedures are heard and acted upon by PRP offices.

This year 208,000 individual taxpayer problems were resolved through PRP. If a case cannot be resolved within five workdays the taxpayer is contacted, advised of the status of the case and provided the name and telephone number of the employee responsible for resolution. PRP also analyzes the underlying causes of taxpayer problems so that organizational, procedural or systemic problems can be identified and corrected.

14th CIAT General Assembly

Commissioner of Internal Revenue Jerome Kurtz was elected President of the Inter-American Center of Tax Administrators (CIAT) during its 14th General Assembly held in Washington, D.C., June 22-27, 1980. This was the first time a CIAT General Assembly had been held in the United States. CIAT was founded in 1967 to provide a forum for the exchange of information experience and technical assistance in tax administration in the Western Hemisphere.

Deputy Secretary of the Treasury Robert Carswell welcomed the more than 200 delegates, observers and special guests at the opening ceremony. Commissioner Kurtz followed with the theme address,

"Fundamental Tax Audit Considerations," and during the week technical papers were presented on various aspects of an audit program. Deputy Commissioner William E. Williams discussed unreported income and U.S. tax administration and Assistant Commissioner Joseph T. Davis spoke on resources support.

Deputy Secretary and Mrs. Carswell hosted a reception for delegates, observers and invited guests at the Hall of the Americas in the Organization of American States building during the week-long event.

On the final day Commissioner and Mrs. Kurtz hosted a dinner for the delegates at the historic Gunston Hall Plantation at Lorton, Va.

Tax administrators elected to the 1980 CIAT Executive Council were (left to right): Manuel Lopez Acosta, Venezuela, Second Councilor; Edgardo Gutierrez Lopez, Costa Rica, First Councilor; Max Rodriguez Fadul, Colombia, First Alternate Councilor; Guillermo Prieto Fortun, Mexico, Third Councilor; Commissioner Kurtz, President; Fernando Ravelo Alvarez, Dominican Republic, Fourth Councilor; Alix Paret, Haiti, Second Alternate Councilor, and Ricardo Cossio, Argentina, Fifth Councilor.

Examinations

During 1980 the IRS initiated a new method to group individual returns for examination selection purposes. Classes, which are groupings of returns by income levels, are used for scoring returns in the discriminant function system (DIF) — a computer method used to select individual returns for examination using mathematical formulas to measure the probability of error — planning workload and staffing and monitoring results of examinations. Total positive income (TPI) — the sum of all positive income values appearing on a return, with losses treated as zero — now is being used to class nonbusiness returns and total gross receipts (TGR) to group business returns. TPI replaces the previously used adjusted gross income (AGI) method of classifying returns.

Examination and Correction Results

The IRS examined 2,179,297 returns in 1980, of which 1,984,224 returns were examined in district offices or at the taxpayer's residence or place of business by tax auditors and revenue agents — a decrease of 89,472 returns from 1979. The remaining 195,073 returns were examined in service centers, a decrease of 4,834 from 1979.

Revenue agents examined 615,671 returns at taxpayer residences or places of business — down 63,631 returns or 9 percent from last year. Tax auditors examined 1,368,553 returns using office audit procedures, down 25,841 returns or 2 percent from the previous year.

Examination coverage of income, estate and gift tax returns was 2.12 percent compared to 2.24 percent in 1979.

The IRS examination program resulted in recommendations for additional tax and penalties of \$9.4 billion — the largest amount ever — compared to \$7.1 billion in 1979. Of this total, individual returns accounted for \$2 billion, corporate returns for \$6 billion, fiduciary returns for \$33.9 million, estate and gift tax returns for \$1.1 billion and employment and excise returns for \$172 million.

The examination program also disclosed overassessments on 130,132 returns resulting in refunds of \$376 million, compared to 133,059 returns with refunds of \$328 million in 1979.

In addition to the district office examination program, service centers also resolve or verify is-

suces that can be handled through correspondence with the taxpayer. During the year 533,046 returns were verified or corrected through correspondence by the service centers, including 351,029 resulting from the matching of information return documents. This total figure is up 36,612 returns, or 7 percent, over 1979. Recommended additional tax and penalties totaled \$123 million, compared to \$119.2 million in 1979.

Statistical Tables 8 and 9 show examination activity for 1980 and 1979.

Large Corporations

The coordinated examination program (CEP), which covered financial institutions and utilities whose gross assets exceed \$1 billion and other corporations whose gross assets exceed \$250 million, was restructured in 1980 to a two-tiered program and new case identification criteria were implemented. The two-tiered program involves a national CEP and a newly established regional CEP, with the most complicated cases assigned to the national program. The new, more sophisticated identification criteria consider factors such as asset size, multiple entities, multiple industries, complexities requiring specialists, gross receipts and application of resources.

At the end of 1980 there were 937 cases in the national CEP and 567 cases in the regional CEP with a combined average number of open years per case of 2.8 compared to a three-year objective. Recommended tax deficiencies and penalties totaled \$4.35 billion during 1980 compared to \$2.7 billion for 1979.

In 1980 the industry specialization program included 13 designated industries, encompassing 483 of the national CEP cases.

In the computer-assisted audit program the IRS uses the skills of 174 specialists trained in computer systems hardware, computer program languages and examination techniques to reduce the cost of investigations, examinations and compliance projects. Engineer agents handled 12,459 requests for technical assistance — up 10 percent over last year. IRS has 319 field engineers located in 26 groups in 17 key districts.

Revenue Agents and Tax Auditors (District Examination Divisions)

Returns Examined by Type of Tax

Dollar Recommendations (Millions) by Type of Tax

Tax Shelters

The tax shelter program was expanded and improved in 1980. At the end of the year 193,933 returns with tax shelter issues were in the examination process — an increase of 11,202 returns over 1979.

A separate staff was established in January 1980 in our Technical organization to accelerate the publication of rulings and furnishing of technical advice and assistance to IRS offices on tax shelter issues. During 1980 thirteen tax shelter revenue rulings were issued and over 100 requests for technical advice and assistance from the Examination Division were processed.

New procedures were developed to identify abusive shelter cases — through information-gathering projects, utilization of information from other agencies and greater use of "John Doe" summonses — and to expedite the appeals process.

With the addition of the commodities and real estate shelter segments this year, the tax shelter handbook developed for examiners now includes detailed examination techniques for seven of the most common shelters. Tax shelter training materials for examiners has been revised and updated and a separate course has been developed on commodities.

W-4 Program

During 1980 IRS developed a program to review and follow up on questionable Forms W-4, Employee's Withholding Allowance Certificate, to check abuses by taxpayers who file incorrect Forms W-4 with employers to avoid withholding of income tax from wages.

Amendments to the *Employment Tax Regulations*, issued March 11, 1980, require employers to submit certain Forms W-4 to service centers, starting with their employment tax returns due in July 1980. If the IRS determines a Form W-4 to be incorrect the employee and employer will be notified that the Form W-4 is not acceptable. The employer then must withhold as if the employee were single, claiming no withholding allowances, until the employer receives a new Form W-4 from the employee. Compliance with the new regulations will be monitored by district examination divisions during income and employment tax examinations.

Unreported Income

The IRS is attempting to identify, examine and investigate areas of high underreporting and nonreporting of income.

Beginning July 1980, a summary of information returns and currency transaction records filed for 1979 is being associated with 1979 individual income tax returns for use in the selection and examination of these returns.

Additional areas of potential noncompliance continue to be identified and tested to determine the extent of noncompliance.

Quality Review

To assure impartial and uniform tax administration in resolving issues and making quality examinations, new standards and guidelines have been developed for selecting, examining and reviewing returns. A system is also being designed to measure and report the quality of completed audits.

Appeals

Under the single level of appeal begun in calendar year 1978, and Revenue Procedure 78-9, the Appeals Division handled more cases than in prior years. Conferences were offered at all locations where previously held under the two-level system. In cases docketed with the U.S. Tax Court, 60 percent of Appeals settlements occurred within four months and 88 percent within six months.

The number of cases received in Appeals continued to increase, from 48,845 cases last year to 53,467 during the current year. Docketed cases — those involving taxpayers who have filed petitions with the U.S. Tax Court — increased 7 percent and there was a 10 percent increase in nondocketed work. Small cases continue to be a large part of Appeals work with over 56 percent of receipts in 1980 involving cases with deficiencies of less than \$2,500, compared to 54 percent in 1979. Disposals also increased from 46,535 cases in 1979 to 49,971 in 1980.

The majority of cases handled in Appeals were settled with the taxpayer without litigation. In nondocketed cases, 85 percent were closed by agreement, an increase from 82 percent, the revised agreement rate for 1979. In docketed cases, 61 percent were agreed in Appeals compared to 57 percent, as revised for 1979. The combined agreement rate for Appeals and district counsel including those cases dismissed by the Tax Court, was 90 percent.

Ending inventory in Appeals increased from 34,996 cases in 1979 to 36,047 at the end of this year. The potential tax liability represented by the cases in inventory increased from \$7.2 billion to \$8.7 billion.

A taxpayer whose informal request for abatement of certain penalty assessments is denied by service center or district office personnel may also request an Appeals conference. During 1980 Appeals disposed of 8,338 penalty appeals compared to 7,200 in 1979. Of the \$17.3 million in penalties protested, \$9.3 million was abated as a result of appeals.

Criminal Investigation

A total of 7,114 investigations were initiated in the general and special enforcement programs of the Criminal Investigation Division in 1980. The general enforcement program provides for balanced criminal tax enforcement and geographical and occupational coverage of the population involving various types of alleged violations of the tax laws. Other enforcement efforts in this program include the prosecution of individuals who file multiple claims for tax refunds, illegally refuse to pay their taxes through various tax protests and promote the use of fraudulent tax shelters.

In the special enforcement program, individuals who derive income from certain illegal activities and violate the tax laws are identified and investigated. This program also includes projects such as the federal strike force program against organized crime, the high-level narcotics financiers and traffickers project, waging tax enforcement and other efforts against racketeers.

Results of Criminal Action in Tax Fraud Cases

Action	Number of Defendants	
	1979	1980
Plea of Guilty or <i>nolo contendere</i>	1,270	1,337
Convicted after trial	342	264
Acquitted	86	80
Not-prossed or dismissed	183	193
Total Disposals	1,881	1,874
Indictments & Informations	1,820	1,832
Percentage of Jail Sentences to Total Sentenced	44.5	46.5

Prosecutions were recommended in 2,267 investigations out of the 8,077 completed. Grand juries indicted or U.S. Attorneys filed informations on 1,832 taxpayers. Prosecution was successfully completed in 1,601 cases.

Taxpayers entered guilty pleas in 1,244 cases, 93 pleaded *nolo contendere* and 264 were convicted after trial. Acquittals and dismissals totaled 80 and 193, respectively. Of the 1,590 taxpayers sentenced during the year, 740, or 46.5 percent, received jail sentences.

Out of these totals, the special enforcement program accounted for 1,302 completed investigations, 455 prosecution recommendations and 257 convictions or pleas of guilty to tax charges.

Cooperation With Others

The Criminal Investigation Division participates in the federal strike force program against organized crime. Strike forces are located in 13 major cities and are coordinated by Department of Justice attorneys. Investigations of high-level narcotics financiers and traffickers are coordinated with the Drug Enforcement Administration.

The Division also provides training in the use of financial investigative techniques against "white collar" crime to investigators for state crime commissions, U.S. probation officers, state securities commissions, U.S. Air Force Office of Special Investigations, state alcohol and beverage control divisions, state police and other federal, state and local law enforcement agencies.

Illegal Tax Protesters

The IRS established a comprehensive program in January 1979 to identify illegal tax protester schemes and to take appropriate action through examination, criminal investigation and collection programs to assure compliance with the tax laws.

As of June 30, 1980, over 9,000 illegal tax protester returns were under examination. During the first nine months of 1980, 135 indictments or informations were returned on illegal tax protesters and 98 were convicted.

Collection

During 1980 the IRS disposed of 2.3 million delinquent accounts. Some \$6 billion in overdue taxes were collected. Of that sum, \$2 billion were collected in response to computer notices sent to taxpayers and \$4 billion were collected on delinquent accounts. Approximately 1.4 million delinquent tax returns were secured, involving \$1.8 billion in additional assessments.

Results of Direct Enforcement on Delinquent Accounts and Returns

	1979	1980
Delinquent Taxes Collected¹		
From Delinquent Accounts	\$3,316.1	\$3,995.9
From Notices	\$1,584.1	\$2,003.7
Delinquent Returns Secured²		
By Collection Division	1,324.2	1,362.4
By Examination Division	58.2	48.1
Additional Tax, Penalty and Interest Assessed on Delinquent Returns (Net of prepaid credits)¹		
By Collection Division	\$1,379.1	\$1,753.4
By Examination Division	\$69.0	\$55.6

¹ millions

² thousands

Returns compliance programs identified potential nonfilers and resulted in securing 55,469 returns with \$17.9 million in additional taxes assessed. Statistical Table 13 shows results for 1980.

Service Center Collection

A service center collection activity, which was developed and tested over several years, was operational in all centers during 1980. This activity makes correspondence and telephone contacts with taxpayers to resolve tax delinquencies and, under certain circumstances, makes arrangements with taxpayers to pay liabilities in installments. These service center collection actions are being evaluated for efficiency and timeliness.

Nonfiler Identification

New procedures for early identification and contact of income tax nonfilers were established in 1980 and case selection criteria were refined to improve the quality of investigations and minimize contacts with persons not required to file. Identification of nonfilers of business returns was improved through matching information documents.

Workload Control

Tax delinquencies were analyzed during 1980 to find ways to cope with the increasing collection workload. For example, certain delinquencies were earmarked to receive additional notices and the timing between notices was changed to increase the possibility of collection before a field contact becomes necessary.

Returns Compliance

New programs dealing with child care and agricultural labor were begun during 1980 after studies showed significant employment tax non-compliance in these areas.

The child care program resulted in several thousand investigations for nonfiling of Form 942, Employer's Quarterly Return for Household Employees, by taxpayers who listed large amounts for in-home child care on their income tax returns.

The agricultural labor program also resulted in several thousand investigations for nonfiling of Forms 943, Employer's Annual Tax Return for Agricultural Employees, by taxpayers who claimed large amounts for hired labor on Schedule F, Farm Income and Expenses.

Bankruptcy

The Bankruptcy Reform Act of 1978, which became effective on Oct. 1, 1979, had a substantial impact on IRS collection operations. The new law requires special handling of tax returns. No tax may be assessed for periods ending before the bankruptcy proceeding began, until an automatic stay of assessment period has expired. To prevent assessment, a new computer program was designed to block the normal processing of tax returns from taxpayers who have declared bankruptcy. This allows the IRS to monitor the court proceeding and then assess the tax when legally permissible.

Offers in Compromise

The offer-in-compromise procedure, authorized since 1831 to compromise liabilities owed to the United States, is used to bring about maximum collection in situations where collection or the correctness of a liability is in doubt. The Collection Division processed 1,763 offers in compromise in 1980.

Child Support Obligations

The law requires the IRS to collect delinquent child support payments on behalf of certain state agencies. In the past IRS collection was used for cases in which a court-ordered child support obligation was delinquent and assignment of support rights had been extended as a condition of eligibility of aid to families with dependent children (AFDC). This year a change in the law extended the responsibility of the IRS to collect child support for nonAFDC families.

Information Returns Program

In 1980, 547 million information documents were received. More than 358 million information returns were received by the IRS from businesses and organizations reporting interest, dividends and other payments. Over 303 million of these were submitted on magnetic media. The Social Security Administration, which under combined annual wage reporting receives and processes Forms W-2, received information from over 189 million Forms W-2.

The IRS received over 100 million pre-1974 Series E savings bonds redeemed in 1980 from the Bureau of Public Debt for inclusion in the information returns program. These bonds date back to 1941. Since 1973, U.S. government bond redemptions have been reported to the IRS on magnetic media.

The IRS will continue to match most information returns submitted on magnetic media to verify that correct amounts are reported on taxpayers'

returns. Also, of the information returns submitted this year on paper, approximately 25 percent will be matched compared to 20 percent last year.

A new form, 1099 NEC, was provided this year for persons in a trade or business to report fees, commissions or other compensation totaling more than \$600 for the year paid to anyone who is not an employee.

In 1980 the IRS notified over 2.1 million taxpayers of potential discrepancies between income reported on their tax returns and income reported on information returns. Also, 1.4 million taxpayers were sent notices of apparent failure to file tax returns based on information returns.

This year the IRS began using information returns in selecting income tax returns for examination and for use in connection with actual examinations. Next year information documents also will be used to locate and contact taxpayers who filed income tax returns in previous years but failed to do so for the current year.

Information Returns Reported on Magnetic Media

Tax Year	Documents (thousands)	Reporting Entities
1967	36,492	1,048
1968	47,686	2,426
1969	58,951	2,963
1970	68,300	4,637
1971	91,449	8,504
1972	115,008	12,758
1973	144,533	13,128
1974*	185,554	21,862
1975*	216,839	32,486
1976*	248,106	35,013
1977*	275,423	39,980
1978*	^a 269,936	38,417
1979*	303,339	43,840

^a Data revised from previous annual report.

* Calendar year data. Data for 1973 and before covers the 6 month period January through June.

Note: For 1978 and subsequent years the volumes shown do not include Forms W-2 and W-2P processed by the Social Security Administration under the combined annual wage reporting system.

International Operations

To conduct the business of the IRS outside the territorial boundaries of the United States, the Office of International Operations (OIO) has foreign posts in key cities around the world. Because of the steady growth of the U.S. citizen population and business investments in foreign countries, this year the IRS increased the number of posts from 14 to 16, adding offices in Nassau and Vancouver. The Tehran post, which was closed in January 1979, this year was relocated to Jidda, Saudi Arabia.

Foreign posts are headed by revenue service representatives (RSRs) who manage the examination, collection and taxpayer service programs at the posts in addition to conducting specialized investigations in support of U.S. domestic examination and criminal cases. Beyond this, RSRs serve as liaisons with foreign tax authorities in both treaty and nontreaty countries.

Compliance Overseas

In 1980 over 16,000 returns were examined and nearly \$250 million in additional tax and penalties were recommended. While about 20 percent of these returns were examined overseas, most returns, including those of foreign entities doing business in the U.S. or U.S. business controlled by foreign interests, are examined in the U.S. In October 1978 Congress enacted sweeping changes for the taxation of U.S. citizens working

OIO Foreign Post Network

U.S. Taxpayers Residing Overseas (in thousands)

overseas. During this past year OIO examined the first returns filed since the change and the effect of this legislation is being evaluated for Treasury and Congress.

Assisting Taxpayers Abroad

Approximately 150,000 taxpayers visited offices in over 120 cities in 68 countries seeking tax assistance and 1,800 taxpayers attended 84 tax seminars sponsored by IRS. Seven military tax workshops were conducted attracting over 550 participants who in turn helped thousands of armed service personnel overseas prepare their own tax returns.

Tax Treaties

The U.S. has income tax treaties with forty countries and estate tax treaties with thirteen, designed to eliminate double taxation, remove tax barriers to trade and investment and curb tax avoidance.

In 1980 IRS representatives met with treaty partners throughout the world to develop the framework for improved exchanges of information and for the resolution of double taxation cases. By exchanging information under the provisions of tax treaties, the IRS enhances worldwide compliance with U.S. tax laws, mitigates instances of double taxation and assists U.S. businesses in securing uniform treatment of their international transactions. We also continued to work closely with the Puerto Rican Department of Treasury and the Virgin Island's Department of Finance to resolve double taxation cases and to exchange taxpayer return information.

Employee Plans

A taxpayer compliance measurement program (TCMP) for employee benefit plan returns was started during 1980 to examine random samples of returns to ensure continued compliance with the Employee Retirement Income Security Act of 1974 (ERISA). Data gathered during the examination of these returns will be used for planning future examination programs, improving the selection of returns for examination and identifying needed changes to the Forms 5500 series returns and instructions. Under the program, which began in January 1980, approximately 18,000 Forms 5500 and 5500C returns with plan years beginning in 1978 will be examined.

An ERISA noncompliance enforcement program was established this year to bring into compliance those employee benefit plans that received favorable pre- or post-ERISA determination letters but failed to comply timely with the law, final regulations or other ERISA requirements. The program is designed to protect the rights and benefits of plan participants by providing limited relief from sanctions for those plans that voluntarily agree to comply with ERISA and restore benefits to participants that were not provided because of failure to comply timely with ERISA.

A revenue procedure issued this year concerning simplified employee pension (SEP) plans gives guidance to sponsors seeking rulings and opinion letters for prototype SEP plans. SEPs, made possible by the Revenue Act of 1978, allow an employer to contribute annually up to the lesser of 15 percent of compensation or \$7,500 to each participating employee's individual retirement account or annuity (IRA). A model SEP agreement — Form 5305-SEP — available now, is a qualified SEP with no further IRS approval when an adopting employer executes it properly.

A post-review program was initiated to ensure that all 17 key districts are uniformly applying the law and IRS procedures when issuing determination letters on the qualification of plans. Under this program determination letters issued on the qualification of plans and the tax-exempt status of related trusts by key districts are subject to selection for post review by the National Office.

During the year 7 regulations and 32 revenue rulings and procedures were issued, as well as 4,621 National Office opinion letters, on master and prototype plans dealing with Keogh plans, corporate plans and individual retirement accounts and annuities. In 1979 the IRS completed a review of pre-ERISA revenue rulings for modification, restatement, obsolescence or revocation and during the current year began making public the results of this review.

Advance determination letters are issued by IRS on the qualification of pension, profit-sharing and other employee benefit plans. During the year 168,974 determination letters were issued on corporate and self-employed plans — an increase of 20 percent over 1979. Also, 19,378 plans were examined to determine the qualification of plans in operation, to verify the employers' allowable deduction for contributions to plans and to assure that the rights and benefits of plan participants are protected.

Exempt Organizations

During 1980 the Exempt Organizations activity issued or revised 8 regulations, 35 revenue rulings and procedures, 374 technical advice memorandums, 19 announcements and 4 publications, and examined 23,807 exempt organization returns. In addition, 52,699 applications, reapplications and requests for rulings from organizations were acted on.

A total of 22,582 organizations exempt under provisions of *Internal Revenue Code* sections 501(c)(3) through 501(c)(8) have been identified to be examined under the taxpayer compliance measurement program (TCMP). Approximately 5,500 TCMP returns will be examined in each of the four fiscal years beginning Oct. 1, 1980.

Examination guidelines were published to alert examiners to various private benefit or inurement problems that may exist in the operation of home health care organizations. The examination coverage in this area increased from five to ten percent in 1980.

The use of new guidelines that provide uniform procedures for identifying, investigating and examining organizations employing questionable claims of tax-exempt church status have assisted in identifying such organizations and resulted in successful litigation against many.

On May 5th and June 6th, 1980, the District Court for the District of Columbia in the case of *Green v. Miller* supplemented and modified a 1971 injunction prohibiting the IRS from recognizing racially discriminatory schools as tax-exempt under *IRC* 501(c)(3). Under the court order the IRS is prohibited from recognizing the tax exempt status of private schools in the State of Mississippi that have been adjudicated discriminatory or have been formed or expanded at the time of public school desegregation and cannot demonstrate that they are not racially discriminatory.

The order further requires that IRS survey all private schools in Mississippi to identify those that were created or expanded at the time of racial desegregation of the public schools. The IRS must then review facts and circumstances to determine if these schools discriminate in admissions, employment, scholarships, loan programs, athletic and extracurricular programs. By terms of the order the IRS must report to the Court in six months and then on each July 1 for the next three years.

With respect to schools outside of Mississippi, the IRS was prohibited by sections 103 and 615 of the Appropriations Act of 1980 from spending any funds during the fiscal year to carry out proposed revenue procedures setting forth standards similar to those required by the court order or to adopt new procedures that would cause the loss of tax exempt status. In these schools the IRS is applying the procedures and examination guidelines in effect before Aug. 22, 1978.

Research and Operations Analysis

During 1980 the IRS revised its long-range planning process to place greater emphasis on the analysis and executive assessment of critical issues and problems. The new process, including periodic executive issues conferences, a Servicewide research plan and a strategic plan document, will be phased in during 1981. Also, this year the IRS established a permanent unreported income research group.

Major Research Projects

Throughout 1980 IRS information reporting programs were reviewed, a project was begun to measure compliance in reporting nonemployment compensation on the newly established Form 1099-NEC and a study on the feasibility of extending information reporting to bearer instruments continued.

Following a two-year pilot study the IRS decided to phase in a program in which payers of non-wage income may satisfy both federal and state information reporting requirements by submitting a single magnetic tape of payments to the IRS that will, in turn, generate secondary tapes for state revenue agencies.

This year, as provided by the Revenue Act of 1978, the IRS began a study to simplify all individual income tax forms and instructions working with private design and language consultants. The study provides for a preliminary report to be sent to Congress in November 1980, while the IRS and the contractor will continue to test and refine the proposed new forms and instructions during 1981.

The IRS continued studies to determine compliance with some of the approximately 90 provisions in the *Internal Revenue Code* that allow taxpayers to defer certain tax consequences to later years. The tax return examination phases of several studies were completed during the year and the collected data are being analyzed

to determine compliance levels, tax consequences and the need for continued efforts in each area. These studies involve state income tax refunds, gains on sales of personal residences and sales of stocks with cost basis reduced by splits or nontaxable distributions.

Other studies dealt with deferred gains on installment sales, amortization of changes in accounting methods, recapture of certain deductions on multifamily housing projects insured by the Department of Housing and Urban Development and tracking amortization or depreciation on certified historic structures. Efforts also were begun to track certain other tax benefits, such as the once-in-a-lifetime exclusion on gains from the sale of a principal residence and special farm valuations for estate tax purposes.

The IRS continued a study of the highway excise tax structure and different tax funding methods for the highway trust fund by sending questionnaires to IRS personnel engaged in the management, examination and collection of taxes dedicated to this fund. Treasury delivered its first progress report on this study to Congress this year and the final report is due in April 1982.

Taxpayer Compliance Measurement

The taxpayer compliance measurement program (TCMP) is the basic IRS research activity for estimating the nature and extent of tax law compliance. The results are used to plan enforcement programs, improve computer selection of returns for examination, allocate IRS resources, formulate taxpayer information programs and improve tax return forms and instructions.

This year the IRS completed TCMP examinations of a sample of corporation income tax returns filed in 1978 and started examination of randomly selected employee plan returns (Forms 5500 and 5500C), individual returns (Forms 1040 and 1040A) and exempt organization returns (Form 990 series).

Statistics

Statistics of Income (SOI) publications issued in 1980 included preliminary reports for individual tax returns for 1978 and unincorporated businesses for 1977, plus complete reports of individual returns for 1977, unincorporated businesses for 1976 and corporations for 1975.

The 1978 preliminary report for individuals contained statistics on the residential and business energy investment credits provided by the Energy Tax Act of 1978. Data reflecting the effect of other tax legislation as well as information on high-income taxpayers also were shown.

This year the IRS published its first supplemental report on domestic international sales corporations (DISCs), presenting information on products and services exported, by country for which the exports were destined. Two other supplemental reports provided information on the foreign income and taxes of U.S. corporations claiming a foreign tax credit and on the operations of foreign subsidiaries of U.S. corporations.

During the year the IRS also provided a report dealing with the sale or exchange of capital assets for tax year 1973, classified by type of asset, by the amount of adjusted gross income and by the length of time the assets were held.

Other SOI publications completed in 1980 included a study of private foundations for 1974 and a report on individual retirement accounts for returns filed in 1976.

SOI publications may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

In 1980 the IRS furnished the Department of Labor a magnetic tape file of a sample of returns for employee benefit plans for 1977 and provided the Treasury Office of Tax Analysis (OTA) a magnetic tape file containing income tax return data from a sample of small corporate businesses and their owners for use in a special study. Work also began on developing a system to provide OTA with data for a report to Congress on the effect of the Crude Oil Windfall Profit Tax Act of 1980.

The IRS also furnished OTA statistics on DISCs, taxpayers who participated in or cooperated with an international boycott and the revised system of taxing domestic corporations on their operations in Puerto Rico and U.S. Possessions.

Tax Models

The five basic tax models — individuals, corporations, sole proprietorships, partnerships and estates — used to make timely estimates of the potential impact and revenue effects of proposed tax legislation were updated in 1980. The models consist of computer programs to tabulate and analyze the most current SOI data available in these areas. Under a federal-state exchange program state governments can obtain copies of the individual income tax model file for their tax administration purposes. The public may purchase from the National Archives the same file without data identifying taxpayers.

Legislative Analysis

This year the IRS developed 16 implementation plans to administer new tax legislation.

Requests for Tax Rulings and Technical Advice (Closings)

Subject	Total	Taxpayers' Requests	Field Requests
Total	31,284	29,869	1,415
Administrative Provisions	107	76	31
Changes in Accounting Methods	7,980	7,980	—
Changes in Accounting Periods	13,313	13,313	—
Earnings and Profits Determinations	1,298	1,298	—
Employment and Self-Employment Taxes	1,041	335	706
Engineering Questions	214	155	59
Estate and Gift Taxes	497	369	128
Excise Taxes	160	75	85
Individual Income Tax Matters	2,223	2,097	126
Corporation Tax Matters	4,451	4,171	280

Technical Activities

During the year IRS acted on 31,284 requests for technical advice, including 21,293 requests for changes in accounting methods and periods, and issued 456 revenue rulings and revenue procedures.

Letter rulings are written statements issued to taxpayers interpreting and applying tax law to specific sets of facts. Such rulings provide guidance concerning the tax effect of proposed transactions. Letter rulings are not precedents and may not be relied upon by taxpayers other than the recipient of the ruling.

Technical advice is issued by the National Office at the request of district offices to provide guidance on the proper application of the tax laws to specific facts in connection with audits of taxpayers' returns or claims for refund or credit.

Revenue rulings are interpretations of the tax laws published in the weekly *Internal Revenue Bulletin* to inform and guide taxpayers, practitioners and IRS personnel.

Updated Procedures

During 1980 the IRS provided revised procedures for issuing rulings and determination letters and for entering into closing agreements, provided revised procedures for furnishing technical advice to district directors and chiefs of appeals and published a complete list of no-ruling areas that provides for early announcement of those issues added or deleted.

Internal Revenue Bulletin

The weekly *Internal Revenue Bulletin* announces official rulings and procedures of the IRS and published Treasury Decisions, Executive Orders, tax conventions, legislation, court decisions and other items of general interest. *Bulletin* contents of a permanent nature are consolidated semiannually into *Cumulative Bulletins*. Weekly and semiannual issues are available to the public through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

During 1980 the *Bulletin* included 398 revenue rulings, 58 revenue procedures, 15 public laws relating to internal revenue matters and 19 committee reports, 80 Treasury Decisions containing new or amended regulations, 19 delegation or-

Revenue Rulings and Revenue Procedures Published

Type	Number
Administrative	20
Employment taxes	19
Estate and Gift Taxes	46
Excise Taxes	37
Exempt Organizations	35
Income Taxes	260
Employee Plans	31
Tax Conventions	8
Total	456

ders, 1 Treasury Department Order, 22 notices of suspension and disbarment from practice before the IRS, 253 announcements of general interest and 3 court decisions.

Art Print Panel

A new advisory group was created this year to advise the IRS on the valuation of art prints. The art print panel consists of print publishers, distributors, retailers and curators and will review taxpayer appraisals to determine whether claimed values are appropriate. The panel will help the IRS cope with abusive tax shelters that use inflated appraisals of art print publishing ventures.

Internal Audit

Additional revenue of \$150 million accrued to IRS when management acted on Internal Audit reports that strengthened controls, improved operations and brought about better service to taxpayers. Top managers were provided with a better perspective on how their functions operated through 42 coordinated audits that sampled offices to evaluate IRS programs nationally and regionally. Abstracts of Internal Audit findings are distributed monthly to IRS officials to alert them to areas that may need increased management attention. Reports are also made to top management on the implementation and effectiveness of actions taken on General Accounting Office reviews of IRS activities.

This year Internal Audit also established a group of auditors to review the design and development of new and significantly modified automatic data processing systems. These reviews determined whether internal controls, documentation standards and audit trails existed and whether controls were cost effective, efficient, complied with legal requirements and carried out management policies prescribed for the system.

Internal Security

Internal Security Division investigations to protect the integrity of the IRS resulted in the arrest or indictment of 107 taxpayers and tax practitioners and 65 IRS employees or former employees and 89 persons were convicted or pleaded guilty. Of these convictions, 20 were for bribery and 14 were for assault while the rest involved conspiracy to defraud the government, obstruction of justice, embezzlement, disclosure of confidential tax information and impersonation of a federal officer.

One investigation uncovered corruption involving members of an IRS unit that appraises values on real property. Bribes estimated at \$62,000 were paid to some IRS employees and a supervisor for placing low appraisal values on property for federal estate and gift tax purposes. The appraisals were estimated at \$17 million below fair market value and the potential tax loss to the government was approximately \$4.5 million. Former IRS employees, executives in private industry, attorneys and certified public accountants were among the 13 defendants in this case. All were convicted.

Assaults and threats against IRS employees increased from 455 in 1979 to 508 in 1980. The Division protects all IRS employees so threatened or assaulted while performing their duties and seeks vigorous prosecution of these cases.

In addition to investigating criminal misconduct or irregularities affecting IRS employees or operations, Internal Security conducts background investigations to determine the suitability of applicants and newly hired employees. The Division completed 11,727 background investigations of employees during the year and conducted police record checks on all persons considered for temporary appointments. These investigations and record searches resulted in the rejection of 107 job applicants and dismissals, suspensions, reprimands, warnings or demotions against 376 employees. In addition, the Division

conducted 527 investigations involving alleged employee misconduct and 128 of these investigations resulted in exoneration of the employees involved.

Integrity Program

Continuing its efforts to assist IRS managers in maintaining a high degree of employee honesty, the Inspection Service's integrity program is aimed at preventing fraud, waste and error. This program includes reviews and investigations to detect and deter material fraud and weaknesses in controls.

The Internal Security Division continued to increase the number of integrity awareness presentations to IRS employees, which include videotapes that realistically portray bribery situations as well as other possible integrity breaches employees may encounter.

Fiscal Management

During 1980 savings of about \$1.4 million were reported and verified through a management-generated savings program that rewards managers who cut costs. This procedure allows managers to reapply half of the savings resulting from their cost-cutting initiatives to programs under their control that they determine to be most in need of additional resources. The balance is used to deal with Servicewide problems or is given up in the next year's budget.

Personnel

In implementing the Civil Service Reform Act this year the IRS developed critical job elements and performance standards for managers and management officials covered under merit pay and implemented a Servicewide merit pay performance appraisal system. In addition, critical job

elements and performance standards were established for approximately 55,000 employees under 300 different standard position descriptions not covered by merit pay. The Senior Executive Service (SES) and the federal equal opportunity recruitment program were implemented, the Executive Resources Board was revised, a Performance Review Board was established and all personnel training programs have been or are being revised to reflect new statutory and regulatory requirements.

Recruitment

This year the IRS negotiated an agreement with the Office of Personnel Management (OPM) to accept fully delegated authority to examine and certify candidates for the internal revenue agent occupation nationwide. This delegation of authority — with an improved equal employment opportunity affirmative action program, targeted advertising and a new rating schedule — will improve the timeliness and effectiveness of recruitment. The IRS is negotiating for similar authority to recruit and examine for additional occupations unique to IRS, such as revenue officer and tax auditor.

Labor Relations

This year the negotiation of a master labor agreement continued with the aid of the Federal Mediation and Conciliation Service.

Labor relations information is provided to field offices biweekly through the *Labor Relations Report*, a newsletter for executives and personnel staffs.

Awards and Recognition

Joseph T. Davis, Assistant Commissioner for Resources Management, received the National Civil Service League Career Service Award this year. In September, Deputy Commissioner William E. Williams and Assistant Commissioner Davis were two of only forty-nine federal executives to receive the SES Distinguished Rank Award from the President. In addition, four other IRS executives received SES Meritorious Rank Awards from the Secretary of the Treasury. They were: Thomas Cardoza, Western Regional Commissioner; William Waters, Mid-Atlantic Regional Commissioner; Americo Attorri, Mid-Atlantic Assistant Regional Commissioner for Resources Management, and Joseph Kump, Fiscal Management Officer. Also, 56 employees received Presidential Letters of Commendation for contributions resulting in benefits of \$5,000 or more

or for exceptional achievement in specific programs and 49 more were recommended to receive commendation letters.

Awards presented under the IRS incentive awards program included 13 Commissioner's Awards and nearly 13,000 awards to employees for adopted suggestions, sustained superior performance and other special acts or services, saving about \$3.3 million.

Other Personnel Programs

The IRS has replaced its alcoholism program with a broadly based employee assistance program through which employees troubled by any personal or emotional problem will be counseled, at their request, to help them identify problems and motivate them to seek professional assistance.

The IRS is conducting tests in eleven offices under OPM's experimental program to examine and evaluate schedules that allow flexible and compressed working hours as well as part-time employment. These tests are being monitored through the use of employee questionnaires, on-site research coordinator reports and an analysis of production data. Information and conclusions concerning the program will be reported to IRS top management and to OPM in May 1981.

Centralized Services

In the second year of centralized services, instructions and guidelines were issued to bring about the uniform processing of work documents by all districts. A new quality measurement system was developed as well as a computerized work planning and control system. Nationwide implementation of both systems was started in the fall of 1980.

Facilities Management

This year the IRS began a major building program in support of the service center replacement system that involves the replacement of almost all automatic data processing equipment in the ten service centers. The design for the first group of five service centers was completed in 1980 and by 1983 new computer rooms will be finished in all centers.

An IRS/General Services Administration task force on energy conservation completed an on-site survey of all IRS service centers and established plans and schedules for immediate energy conservation. The measures recommended will result in energy savings of up to 33 percent based on 1975 use. This energy savings could keep approximately 3,600 average homes comfortable through one entire heating season.

Management's continued emphasis on reducing the number of calls placed over the federal telecommunications system network enabled the IRS to absorb a tariff rate increase of approximately \$160,000 without additional cost.

Paperwork Management

The IRS continued its efforts to eliminate unnecessary internal management reporting, canceling 26 reports in 1980 for annual savings of approximately \$540,000.

Disposing of some 185,000 cubic feet of records and retiring nearly 432,000 cubic feet to federal record centers resulted in the release of space and equipment valued at \$6.9 million.

During 1980 the IRS completed testing and evaluating equipment for the wage information retrieval system (WIRS), one of the largest computer-assisted microfilm retrieval applications in the country. This program, conducted at the Andover Service Center, is an integral part of the federal government's effort to eliminate duplicate information reporting by the public.

Other Facilities Programs

The IRS had 4.5 disabling injuries per million staff hours worked in calendar year 1979, compared to 3.2 disabling injuries per million staff hours the year before. IRS employees drove 121 million miles with an accident frequency rate of 5.2 accidents per million miles driven. In 1978, employees also drove 121 million miles, but had an accident frequency rate of 5.5 accidents for each million miles driven.

Braille machines and reading machines to aid research by visually handicapped taxpayer service employees are being tested and evaluated at seven pilot locations around the country.

Security

During 1980 the IRS reviewed and evaluated security at computer sites, developed systemic and procedural safeguards and assisted system designers. The IRS also conducted safeguard reviews of federal, state and local governmental agencies that receive taxpayer information to assure that those agencies comply with IRS security standards. IRS has initiated a risk analysis program to examine actual and potential threats to the security of automatic data processing installations and systems and to recommend cost beneficial safeguards to reduce the risk of loss, alteration or unauthorized disclosure of sensitive automated data.

Training

This year the IRS conducted 555 training courses, providing some 96,700 opportunities for individual training, with some employees participating in more than one training activity during the year.

A new training plan has been adopted, calling for about one-half of the training curriculum in the next decade to be delivered at the larger posts-of-duty rather than in centralized classrooms. This will result in a need for fewer instructors and savings in travel and per diem.

The IRS also conducted a revised executive development program, added a new tax administration course to the executive training curriculum and introduced a new computerized system for administering and monitoring individual development of executives.

A new training program prepared internal revenue agents to summarize the prosecution's case or to give expert testimony in trial appearances. Pretrial and during-trial duties and actual presentation of expert testimony are all stressed during the training.

Training also was developed to help problem resolution officers manage their program and to learn to identify systemic and procedural problems when attempting to resolve taxpayer complaints not satisfied through normal IRS channels.

In response to passage of the Crude Oil Windfall Profit Tax Act of 1980, training was developed to provide selected examiners with an understanding of the law and congressional intent, information about required examinations and verifications under the proposed regulations and an overview of the report writing implications of the Act.

Other new training programs developed in 1980 cover a basic and advanced statistical sampling course for revenue agents, combined annual wage reporting, disclosure orientation for service center employees and illegal tax protester training for employees who have public contact.

And, the IRS has entered into an agreement with Arkansas Enterprises for the Blind so that some visually impaired students will receive IRS training needed for employment with the IRS.

Equal Employment Opportunity

From July 1979 to July 1980, full-time regular employment increased by 2.4 percent. The number of women employed increased 6.1 percent and minorities by 12.6 percent. Women increased their representation in the higher grades from 5.3 percent of the positions at GS-13 and above to 6.5 percent and minorities from 6.5 percent to 7 percent. The employment of women and minorities also gained in such key jobs as revenue agent, attorney, criminal investigator and appeals officer.

Nationwide, IRS offices observed such special events as Black History Month, Women-in-Government Month, Hispanic Heritage Week and Asian/Pacific American Week. All managers and executives received equal employment opportunity (EEO) training as part of merit pay and SES training, while other EEO training was offered in courses such as that given to special emphasis coordinators.

IRS contract awards during 1980 totaled \$23,238,000 to small businesses and \$6,020,000 to minority and disadvantaged firms.

Data Services

The past year has been a period of transition with Data Services preparing for the equipment replacement program (ERP). Two divisions were merged to form a Tax Systems Division, consolidating analysts and programmers; guidelines were established for systems development; improved procedures were introduced for analysis, design and programming, and greater emphasis was placed on use of a high-level computer programming language.

The service center replacement system (SCRS), the first portion of ERP, moved closer to realization with the issuance of a formal invitation to the computer industry to submit bids for the system. Another step toward SCRS was taken with

nationwide installation of the data communications processing system (DCPS). DCPS currently augments the integrated data retrieval system and will be coupled with SCRS.

In 1980 Data Services worked with its IRS users to design and program changes that would eliminate the need at ten service centers for manually sorting returns and documents by district office code. Beginning Jan. 1, 1981, service centers will no longer sort most tax returns and related documents by the geographic locations in which taxpayers reside. Previously such sorting was done for control and accounting, but these procedures will now be automated. It is estimated that this refinement will save the IRS \$2.2 million when fully implemented.

Data Services also continued to respond to user needs for changes and improvements to existing programs. Currently there are more than 2,700 computer programs active in the National Office alone to meet user requirements.

National Computer Center

With construction and renovation continuing at the National Computer Center (NCC), five computer systems, the library of some 125,000 magnetic tapes and related functions were moved to a permanent location in an addition to the existing building.

As of July the number of taxpayer accounts on the individual master file had grown to 117.2 million, an increase of 2.8 percent over the same period in 1979. The business master file grew to 22.9 million accounts — 9.1 percent above 1979. The exempt organization, employee plans and individual retirement account master files contain 1.1 million, 1.3 million and 260,000 accounts, respectively.

Another computer system, making a total of nine, was installed and producing in March, making it possible for NCC to accelerate the

processing of more than 300 million information documents to assist in screening returns for examination.

Detroit Data Center

The payroll system, which services all of IRS, was converted to a new computer system that now handles the bi-weekly payroll for more than 90,000 employees. As the IRS' central site for management information systems, the Data Center generates about 150 personnel and fiscal reports, and more than twice that many for other projects each month. This year the Data Center also has provided TCMP tabulations, management information reports and special evaluations such as the casino/racetrack winnings compliance study.

Chief Counsel

The Chief Counsel, an Assistant General Counsel of the Treasury Department, is the chief legal officer for the IRS and is a member of the Commissioner's executive staff. As such the Chief Counsel advises the Commissioner on matters pertaining to the administration and enforcement of the internal revenue laws and related statutes, as well as on nontax legal questions.

The Chief Counsel is assisted by a Deputy Chief Counsel (General), a Deputy Chief Counsel (Litigation), a Deputy Chief Counsel (Technical) and seven regional counsels.

The Office of Chief Counsel employs over 900 attorneys, making it one of the largest law firms in the country. These attorneys are located in the National Office, the seven regional counsel offices and 45 district counsel offices.

Approximately 40 percent of attorney time is spent handling litigation in the United States Tax

Court. The attorneys also advise the IRS and assist the Department of Justice on refund suits, criminal tax cases, suits, seeking the disclosure of files and documents of the IRS, collection suits, and nontax litigation involving the IRS in federal and state courts.

In 1980 the Chief Counsel library began to reclassify the 100,000-volume collection on taxation, legislation and economics. The project will be accomplished with an automated cataloging system, allowing the library to participate in the federal bibliographic data base, greatly expanding reference and interlibrary loan service.

Criminal Tax

For 1980 there were 2,726 referrals by Counsel for prosecution and some 19,000 staff hours were spent on legal assistance to Criminal Investigation Division.

Procedures for processing grand jury requests and evaluations were revised during the year to speed up to the handling of such matters. Deadlines were established for regional and Chief Counsel review of requests for the initiation of grand jury investigations. In addition, Chief Counsel established procedures for providing evaluations of the results of grand jury investigations to district counsels. The IRS now is providing a faster response to United States Attorneys' requests for grand jury assistance and evaluation.

ation of the results of grand jury investigations. In *United States v. Clardy*, 612 F. 2d 1139 (9th Cir. 1980), the circuit court upheld the IRC section 7206(2) conviction of an individual who sold tax shelter schemes that involved a fictitious "paper trail" to justify certain interest deductions.

In *United States v. Peister*, No. 78-1961 (10th Cir., decided Aug. 4, 1980), the court upheld the conviction of a tax protester who used a church/vow of poverty defense in a section 7205 prosecution. In upholding the conviction the court found the church/vow of poverty assertions insincere.

EP/EO

During 1980 the Employee Plans and Exempt Organizations Division developed regulations implementing the Employee Retirement Income Security Act of 1974 (ERISA), the Tax Reform Act of 1976 and the Revenue Act of 1978. Regulations were published in proposed, temporary or final form on such matters as the limitations on contributions to and benefits from employee plans, the elapsed-time rules for minimum vesting and participation requirements for employee plans, the rules for medical reimbursement plans, the rules for voluntary employee benefit plans and the rules for disposition of private property and self-dealing for private foundations.

volving matters of ethics also rose sharply due to the enactment of the Ethics in Government Act of 1978. The Division also is responsible for reviewing the financial disclosure statements that IRS and Chief Counsel officials are required to file under the Act.

General Litigation

The General Litigation Division furnishes legal assistance to the IRS in connection with the collection and internal assessment procedures relating to federal taxes. During the past year the constitutionality of the crude oil windfall profit tax has been challenged; several states have revived attempts to obtain federal tax refunds through local escheat laws; the issue of whether

telephone companies are to be considered third-party recordkeepers under IRC 7609(a)(3)(C) because they issue credit cards has been tested; tax protesters have continued efforts to impede collection of taxes through the use of false or incorrect Forms W-4; the authority of district directors to direct employers to disregard Forms W-4 as false or incorrect was established; IRS information-gathering during audit in connection with its taxpayer compliance measurement program has been challenged, and the Supreme Court again upheld the broad authority of the IRS to obtain information by means of a summons in *United States v. Euge*, 444 U.S. 707 (1980).

Interpretative

Much of the work of the Interpretative Division during 1980 was in fulfilling its responsibility as principal legal advisor to the division directors under the Assistant Commissioner for Technical. A number of revenue rulings and technical projects were considered, especially in connection with IRS efforts to deal with tax abuse devices and questionable tax shelter schemes. In addition, legal advice was provided on such matters as the implementation of the new income tax withholding exemption provisions.

Legislation and Regulations

The Legislation and Regulations Division continued to develop regulations to implement the Tax Reform Act of 1976, the Revenue Act of 1978, the Energy Tax Act of 1978 and the Foreign Earned Income Act of 1978. The Division also

began to develop regulations to implement the Crude Oil Windfall Profit Tax Act of 1980.

During the year the Division published 46 new final regulations, 18 temporary regulations and 58 proposed regulations, while the public participated in 27 hearings on proposed regulations.

Some of the regulations projects were: targeted jobs credit, taxation of unemployment compensation, disability income exclusion, tax treatment of certain homeowner associations, withholding on gambling winnings, gas guzzler tax, various aspects of the windfall profit tax, reporting with respect to income from bearer certificates, deposit requirements for withheld income and FICA taxes and recovery of excessive profits on government contracts (Vinson-Trammell Act).

Refund Litigation Cases Received

Tax Court Cases Received

(Total above bars is total number of cases.)

Tax Litigation

In test cases a district court in Delaware and the Tax Court ruled that International Telephone and Telegraph's 1970 stock merger with the Hartford Fire Insurance Company could qualify as a tax-free reorganization under section 368(a)(1)(B), even though cash had been paid for 8 percent of the acquired corporation's stock. The trial courts' opinions determined that the statute's "solely for voting stock" requirement could be satisfied when the corporation acquired at least 80 percent of the target corpo-

ration's stock in exchange for its voting stock, notwithstanding the remainder of the target stock could have been acquired for cash. These holdings reversed the IRS' position and the accepted position of the majority of the tax bar for the last 40 years.

The First and Third Circuit Courts of Appeal reversed and remanded the lower courts' opinions, thereby sustaining the government's position that "solely" in the statute provides no exceptions. The issue is still pending in the Fourth and Ninth Circuits.

Cigarettes, total ¹	2,454,829	2,402,857
Small (Class A), \$4 per thousand	2,454,811	2,402,847
Large (Class B), \$8.40 per thousand, except if over 6 1/2 inches long \$4 per thousand for each 2 3/4 inches or fraction thereof	17	10
Pipements		
Cigars, total ¹	38,225	39,500
Large cigars, total	35,096	36,429
Wholesale price not more than \$235.294 per thousand, \$1 1/2 percent	31,029	33,664
Wholesale price more than \$235.294 per thousand, \$20 per thousand	3,480	4,775
Small cigars, 75 cents per thousand	1,112	1,048
Pipements	23	13
Imported cigars, cigarettes, cigarette papers and cigarette tubes (collected by Customs, rates same as domestic)	3,006	2,714
Miscellaneous tobacco		
Cigarette papers and tubes, paper one-half cent per 50, tubes 1 cent per 50	1,457	1,344

Table 2.—Continued
(In thousands of dollars)

Sources of revenue	1979	1980
Excise taxes—Continued		
Manufacturer's excise taxes, total	7,057,812	8,487,421
Gasoline, 4 cents per gallon	4,535,065	4,218,147
Lubricating oil, etc., 6 cents per gallon	108,647	100,402
Tires (wholly or in part of rubber), over tubes, and tread rubber:		
Tires, highway type, 10 cents per pound, other, 5 cents per pound except laminated tires (other than type used on highway vehicles), 1 cent per pound	820,522	835,440
Inner tubes, 10 cents per pound	35,720	26,870
Tread rubber, 5 cents per pound	22,341	20,314
Motor vehicles, chassis, bodies, parts, and accessories		
Passenger automobiles, chassis, bodies, etc., 7 percent ¹	-38	306
Trucks and accessories for trucks and buses, 8 percent	965,486	853,538
Parts and accessories for trucks and buses, 10 percent	223,721	234,852
Parts and accessories for trucks and buses, 10 percent	17,537	22,120
Fishing rods, creels, etc., 10 percent	30,418	33,640
Bows and arrows, 11 percent	5,039	6,222
Firearms (other than pistols and revolvers), 11 percent	43,164	40,956
Shells and cartridges, 11 percent	28,214	31,583
Black Lung ¹	232,056	251,288
Fuel economy, \$200 to \$550		
Other ¹	1	1,743
Retailer's excise taxes, total	553,291	580,144
Noncommercial aviation gasoline, 3 cents per gallon	10,720	10,805
Noncommercial aviation fuel other than gasoline, 7 cents per gallon	35,920	36,626
Diesel and special motor fuels, 4 cents per gallon (in some instances 2 cents per gallon)	506,651	512,718
Other ¹		
Miscellaneous excise taxes, total	3,223,333	3,358,198
Telephone and teletypewriter exchange services, 2 percent ¹	1,382,193	1,117,834
Transportation of persons by air, 8 percent	1,272,003	1,565,971
Transportation of property by air, 5 percent	79,009	84,971
Use of international air-travel facilities, \$3 per person	74,844	97,895
Con-operated gaming devices, \$250 per device per year ¹	4,867	840
Wagering taxes:		
Occupational tax, \$500 per year	908	1,079
Wagers, 2 percent of amount wagered	9,124	10,972
Use tax on highway vehicles weighing over 26,000 pounds, \$3 per 1,000 pounds per year (installment privileges permitted)	251,793	263,272
Use tax on civil aircraft, \$25 per year with an additional 2 cents per pound on non-turbine engine powered over 2,500 pounds or 3 1/2 cents per pound on turbine engine powered	27,741	17,583
Firearm transfer and occupational taxes ¹	728	1,093
Foreign insurance, 1 cent or 4 cents per dollar of premium	69,261	74,630
Exempt organizations, total	68,567	68,233
Net investment income, 2 percent ¹	85,217	65,280
Self-dealing, 5 percent on self-dealer, lesser of \$10,000 or 2 1/2 percent on foundation	234	236
Excess business holdings, 5 percent on foundation	24	67
Taxable expenditures, 10 percent on foundation, lesser of \$5,000 or 2 1/2 percent on foundation		
Failure to timely file certain information returns, \$10 per day up to a maximum of \$5,000	130	117
Failure to distribute income, 15 percent of undistributed income	1,653	1,552
Investments which jeopardize charitable purpose, 5 percent on foundation, lesser of \$5,000 or 5 percent on foundation manager	1,306	976
5 percent on foundation manager	3	2
Employee pension plans, total	2,050	2,844
Excess contributions to an IRA, 6 percent of excess amount	990	894
Tax on underdistributions from an IRA, 50 percent of underdistribution	116	103
Prohibited transactions, 5 percent of prohibited transaction	279	542
Tax on excess contributions to an HR-10 Plan, 6 percent of excess amount	18	33
Failure to meet funding standards, 5 percent of funding deficiency	261	672
Failure to file registration statement, \$1 per day up to \$5,000	51	53
Failure to file notification of change, \$1 per day up to \$5,000	3	3
Failure to file statement required by section 6047 or 6058, \$10 per day up to \$5,000	306	711
Failure to provide IRA reports, \$10 each failure	10	2
Black Lung benefit trusts, total		
Taxes on lobbying expenditures, 25 percent of taxable lobbying expenditures	11	12
Winnings, 30 percent to 70 percent	125	270
Other ¹		
Unclassified excise taxes ¹	72,128	3,081,078

*Transition quarter.

* Less than \$500.

* Revised.

1. The receipts in the various states do not indicate the federal tax burden of each since in many instances taxes are collected in one state from residents of another state. For example, withholding taxes reported by employers located near state lines may include substantial amounts withheld from salaries of employees who reside in neighboring states.

2. Includes taxes on unrelated business income of exempt organizations.

3. Collections of individual income tax not withheld include old-age, survivors, disability and hospital insurance taxes on self-employment income (SECA). Similarly, the collections of individual income taxes withheld are reported in combined amounts with old-age, survivors, disability and hospital insurance taxes (FICA) on salaries and wages. Estimated separate national totals for individual income tax and for old-age, survivors, disability and hospital insurance taxes are shown in the text table (Gross Internal Revenue Collections) on page 11 and are used in obtaining national totals for individual income taxes and employment taxes in Table 3.

4. Self-employment tax and taxes imposed by the Federal Insurance Contributions Act are applicable with respect to Guam and American Samoa. Amounts of such taxes collected in Guam and American Samoa are combined with similar taxes reported for "Office of International Operations—Other."

5. Includes fiduciary income tax collections of \$1.8 billion.

6. Beginning with fiscal year 1957 the United States total is adjusted to exclude withheld individual income taxes transferred to the Government of Guam in accordance with the provisions of Public Law 830, approved Aug. 1, 1950 (54 Stat. 332). This adjustment was to \$19.2 million for 1980.

7. Includes net adjustment of \$11.5 million made by the Department of the Treasury.

8. This district is designated to report all revenue collections received from taxpayers residing outside of the area serviced by its Internal Revenue Service Center.

9. Tax payments made to banks, under the Federal Tax Deposit (FTD) system are included in the internal revenue collections for the district in which the FTD is purchased. However, such payments are not classified by Internal Revenue districts (nor by tax subclasses to which excise tax payments relate) until the FTD payment is applied to the taxpayer's liability from tax returns filed.

10. Represents credits allowable on income tax returns for certain gasoline and lubricating oil tax payments and for excess payments under the Federal Insurance Contribution Act (FICA).

11. Designations by taxpayers of a portion of their taxes to the Presidential Election Campaign Fund are not collections, as such, because they do not affect taxpayer liability. Transfers of amounts to this fund are made on a national basis only and, therefore, have no effect on district and regional collection data.

12. Represents amounts offset against outstanding tax liabilities other than those for Forms 1040 and 1040A on which the credits are claimed.

13. Includes amounts transferred to special accounts for Puerto Rico, Virgin Islands and the Northern Mariana Islands.

14. Amounts of Internal Revenue taxes collected on Puerto Rican products transported to the United States or consumed on the island (less refunds, drawbacks, and expenses) are covered into the Treasury of Puerto Rico under provisions of secs. 7552(a)(3) and 5314(a)(4) of the Internal Revenue Code of 1954. The gross amounts are included in overall collection results (Tables 1 through 3).

15. Repeated effective January 1, 1980 (P.L. 96-39).

16. Refer to Table 2 for components.

17. Detail does not add to total because the total includes negligible amounts of miscellaneous collections not shown separately.

18. Contains, among other items, amounts paid into depositaries but not yet classified into excise detail from tax returns filed. 1980 data primarily reflect windfall profit tax amounts.

19. Corporation income tax rates: Effective January 1, 1965, first \$25,000 of net income normal tax of 22 percent, net income in excess of \$25,000 combined normal and surtax of 48 percent. Normal tax and surtax also apply to net income derived by certain exempt organizations from unrelated trade or business. Effective January 1, 1968, a 10 percent per annum surcharge was added to the tax (Public Law 90-364). The surcharge was extended to December 31, 1969, by Public Law 91-53, extended to June 30, 1970, by Public Law 91-172 at a 5 percent annual rate,

and then discontinued. Under the Tax Reduction Act of 1975 (P.L. 94-12), effective for 1975 returns, surtax exemption increased to \$50,000 and normal tax reduced to 20 percent on first \$25,000 of taxable income. These changes were extended by the Revenue Adjustment Act of 1975 (P.L. 94-164) to June 30, 1976, for 1976 returns at rates designed to achieve the half year extension. The lower rates and higher surtax exemption were extended through 1977 by the Tax Reform Act of 1978 (P.L. 95-455) and through 1978 by the Tax Reduction and Simplification Act of 1977 (P.L. 95-30). Effective for tax years beginning January 1, 1979, the Revenue Act of 1978 (P.L. 95-600) imposed a new rate structure graduated from 17 percent to 48 percent of taxable income and eliminated the normal tax, surtax, and surtax exemption.

20. Individual income tax rates: Effective January 1, 1965, graduated rates from 14 percent to 70 percent of taxable income. A 10 percent per annum surcharge added by Public Law 90-364, effective April 1, 1968, for individuals, was extended to December 31, 1969, at the same annual rate (Public Law 91-53), extended to June 30, 1970 (Public Law 91-171) at a 5 percent annual rate, and then discontinued. Includes SECA taxes of 6.1 percent on net earnings up to \$22,900 for 1979 and \$25,900 for 1980.

21. Rates of tax are: Income tax graduated withholding on wages in excess of exemptions: Public Law 88-368, effective July 1, 1967, 14 to 33 percent; Public Law 91-172, effective January 1, 1970, 14 to 25 percent; 14 to 36 percent effective January 15, 1972, under Public Law 92-178; 16 to 36 percent, effective April 30, 1975, under Public Laws 94-12 and 94-164; 15 to 36 percent, effective June 1, 1977, under Public Law 95-30; 15 to 39 percent effective January 1, 1979, under Public Law 95-600. A combined FICA tax rate of 12.26 percent was in effect on salaries and wages up to \$22,900 for calendar year 1979 and \$25,900 for 1980.

22. Consists of regular railroad retirement combined tax rate of 21.78 percent for calendar years 1979 and 1980. Tax applies to employers (15.63%) and employees (6.15%) and is imposed on taxable portion of wages (limited to first \$1,908.33 of monthly taxable compensation for 1979 and \$2,158.33 for 1980). Further includes railroad employee representatives tax of 21.76 percent on taxable portion of compensation received. In addition, a supplemental tax levied quarterly by the Railroad Retirement Board is imposed on employers and employee representatives based on hours worked.

23. Employers of one or more persons in each of 20 calendar weeks or who paid wages of \$1,500 or more in any calendar quarter taxed 3.4 percent on taxable portion of wages up to \$6,000. This tax is reduced by credits for unemployment contributions paid to states up to 2.7 percent of FUTA tax.

24. Prior to January 1, 1977, estate tax rates were graduated from 3 percent on the first \$5,000 of net estate in excess of a \$60,000 exemption to 77 percent on portion over \$10,000,000; gift taxes were three-fourths of the estate tax schedule for corresponding brackets with a \$30,000 exemption subject to a \$3,000 annual exclusion for each donee. Beginning January 1, 1977, the separate rates for estates and gifts were replaced by unified rates of tax graduated from 18 percent to 70 percent. The separate exemption amounts were replaced by a unified credit of \$47,500 to be phased in over a 5 year period (\$38,000 credit for 1979 and \$42,500 for 1980).

25. Taxes on passenger automobiles and light trucks repealed December 11, 1971, by the Revenue Act of 1971.

26. Includes 50c and 2 percent per ton taxes on underground-mined coal and 25c and 2 percent on surface-mined coal.

27. Includes delinquent taxes on items repealed by Public Laws 87-458, 88-36, and 89-44. Also includes sugar and interest equalization taxes that have expired.

28. Rate was reduced from 5 percent to 4 percent on January 1, 1978, to 3 percent on January 1, 1979 and to 2 percent January 1, 1980 (Public Law 91-614).

29. Repeated effective June 30, 1980, by the Revenue Act of 1978 (P.L. 95-600).

30. Transfers of machine guns, short-barreled firearms, silencers, etc., \$200 each; certain guns with combination shotgun and rifle barrels, and other special types of firearms, \$5 each. Occupational taxes are levied on manufacturers, importers, or dealers in firearms and are included in the amounts shown.

31. Rate was reduced from 4 percent to 2 percent for taxable years beginning after September 30, 1977 (P.L. 95-600).

Table 4.—Amount of internal revenue refunds including interest
(In thousands of dollars)

*This figure does not represent a true universe of section 501(c)(3) organizations because certain organizations, such as churches, their integrated auxiliaries and conventions or associations of churches need not apply for recognition of exemption with the IRS unless they desire a ruling. When issued, the ruling letter goes to the central organization but covers all subordinate units. Only the central organization is on the EOMF where it is counted as one entity. Subordinate units considered nonintegrated auxiliaries are on the EOMF and in the above figures since they may be required to file information returns as prescribed under IRC 6033.

Five applications for exempt status under IRC 501(c)(21) have been approved and will be included in the active entities on the EOMF after processing.

*This figure represents actual IRS operating costs from FY 1975, exclusive of reimbursements received from other agencies for services performed. While the operating cost figures for fiscal years prior to 1975 may in some cases include reimbursements, those amounts are small and do not alter the cost figures in column 3.
—Economic Stabilization Program average positions included in 1972, 1973 and 1974.
—Federal Energy Program average positions included in 1974.
—1972 adjusted by 3,990 average positions to reflect the AT&F transfer—July 1972. AT&F included in years 1948 - 71.
—Eleven average positions transferred to office of the Secretary in 1965. Twenty average positions transferred to Office of the Secretary in 1963.
